Manufacturer: KNC ONE, indentical to their model KNC ONE TV-Station DVB-S2

Digital Satellite TV Card with High-Definition (HDTV)

This is the right card for you to take advantage of the seemingly endless TV and radio programming ava

In an effort to satisfy every need, including the reception of Pay-TV*, this card even has a standardised

TV and Radio

Watch TV like you have never done it before, with the clarity, detail, and quality of HDTV (MPEG4 stand

Recording

Recording your favourite radio and TV programming is equally comfortable. Start recording manually or use the recording timer to schedule a recording ahead of time. TV programming can be recorded by simply clicking on a programming item in the Teletext display (radio programming can only be recorded manually). Edit the recorded material and burn it to CD or DVD using video editing software to enjoy it for many years to come.

Internet

If you live in a rural region or an area that does not offer DSL, or if you live in a city but do not wish to buy any additional hardware, you can use this product (and a separate service provider) for high-speed Internet Access**. Simply find a service provider or select one from the list of providers and sign up for a service, or start surfing the Internet immediately using call by call.

Features

- Recording and editing of digital radio and TV programmes using various formats in DVD quality
- PCI audio streaming (audio is carried using the PCI slot, which eliminates the need for the analogue audio loop back cable)
- High-speed Internet access using DVB-S and DVB-S2
- Time shifting
- EPG (Electronic Program Guide) using the signal carried with the TV program and not the Internet
- Teletext
- HDTV (MPEG2 standard)

Connectors

- F-Jack for the digital satellite LNB
- Mystique-View Modul Connector

Software

- DVBSHOP.tv Player (based on DVBVIEWER engine)
- EPG (Electronic Programme Guide)
- Manuals in PDF format

Contents

- PCI Interface card
